

Integrate Rapid API

```
const axios = require("axios");

const options = {
  method: 'GET',
  url: 'https://myallies-breaking-news-v1.p.rapidapi.com/GetCompanyDetailsBySymbol',
  params: {symbol: 'twtr'},
  headers: {
    'X-RapidAPI-Key': 'SIGN-UP-FOR-KEY',
    'X-RapidAPI-Host': 'myallies-breaking-news-v1.p.rapidapi.com'
  }
};

axios.request(options).then(function (response) {
  console.log(response.data);
}).catch(function (error) {
  console.error(error);
});
```

The screenshot displays the RapidAPI dashboard for the 'Breaking News' API. The interface includes a search bar, navigation links (Endpoints, About, Tutorials, Discussions), and API statistics (Popularity: 0.4 / 10, Latency: 32ms, Service Level: 0%). The 'Endpoints' section lists three endpoints: '/GetCompanyDetailsBySymbol', 'Company News', and 'Real-time News Feed'. The selected endpoint, '/GetCompanyDetailsBySymbol', is shown with its description 'Gets company's quote details'. Below this, the 'RapidAPI App' is set to 'default-application_6861092' and the 'Request URL' is 'rapidapi.com'. The 'Code Snippets' tab is active, showing a JavaScript code snippet for using the API with Axios. The code includes the necessary headers and parameters for the GET request.

```
(Node.js) Axios Copy Code
const axios = require("axios");

const options = {
  method: 'GET',
  url: 'https://myallies-breaking-news-v1.p.rapidapi.com/GetCompanyDetailsBySymbol',
  params: {symbol: 'twtr'},
  headers: {
    'X-RapidAPI-Key': '457b90ee95msh88e9ef9b11dcba6p1bbecjsn51cae080582d',
    'X-RapidAPI-Host': 'myallies-breaking-news-v1.p.rapidapi.com'
  }
};

axios.request(options).then(function (response) {
  console.log(response.data);
});
```
